

# Reed Turgeon

## Full Stack Software Engineer

[turgeon.dev@gmail.com](mailto:turgeon.dev@gmail.com) | 508-446-6633

[ReedTurgeon.com](http://ReedTurgeon.com) | [linkedin.com/in/reedturgeon](https://linkedin.com/in/reedturgeon) | [github.com/MrT3313](https://github.com/MrT3313)

Since my earliest memories my experiences have been grounded in teamwork. This is evident in, to highlight a few, my family selling the raspberries grown in our yard when I was a toddler, earning my Eagle Scout in high school, or successfully growing and selling a startup after graduating college.

These experiences have revealed to me that in either a leading or supporting role I enjoy putting in the work. In that vein I welcome constructive criticism as it facilitates my main goal to iterate on who I am today in order to become a better person, teammate, and developer tomorrow. Should you decide to have me join your team you can expect a consistent commitment to my work, the team, and your organization.

## COMPETENCIES

Agile Development | JavaScript | Python

React | React Hooks | Redux | HTML | CSS | LESS / Sass | Styled Components | MaterialUI  
SQL | Postgres | Express | NodeJS | Jest | Supertest | Cypress | Django | Netlify | Heroku | Git

## PROJECTS

### **BookShelf** ( [Project Link](#) | [Codebase](#) )

A single page application to find, read, and review books

Postgres | Express | React | NodeJS

- Independently designed and built with a focus on well documented, small feature releases

### **Conway's Game of Life** ( [Project Link](#) | [Codebase](#) )

Zero-player cellular automaton

React Hooks

- Independently built to explore simulation logic and practice React state management with Hooks

## WORK EXPERIENCE

### **Lambda School**, Computer Science Section Lead – Remote

February 2020 – April 2020

- Responsible for 16 Team Leads that oversaw ~150 students
- Monitored all clerical submissions and facilitated effective communication between each Team Lead and the Student Success Coordinators

### **Lambda School**, Full Stack Web Development Team Lead – Remote

July 2019 – December 2019

- Technical mentor for 7–10 students: Held daily 1:1's and team stand-up meetings via Zoom to address technical challenges, reinforce lecture material and lead JavaScript whiteboard challenges
- Project Lead for 4 Build Weeks: Guided groups of 7-14 developers in delivering one project inclusive of all Lambda's curriculum tracks (Full Stack Web, Android, IOS, Data Science, and UX)

### **PiraShield, Inc.**, Startup Comptroller – Wellesley MA.

December 2016 – July 2018

- Finance: Designed and managed all financial recording and reporting systems
- Management: Designed an operational management system to identify, track and communicate performance
- Results: These systems supported the company through ~3000% revenue growth (\$800/Mo – \$25,000/Mo) and were integral in the due diligence process and sale of the company to a European competitor

## EDUCATION

### **Full Stack Web Development**

November 2018 – April 2020

[Lambda School](#), Remote Real-Time Education Model

### **BS: Business Administration, Finance Concentration**

September 2012 – May 2016

[Babson College](#), Wellesley MA
